

**Test case:** Perform login

**Test ID:** TC\_1

**Pre-conditions:**

The test user credentials are stored in the database

The system is available at the address: <http://localhost:8080/hotel/faces/login/login.xhtml>

Step	Test step	Testdata	Expected result	Pass/Fail	Notes/bug
1	Open the browser and start the system	<a href="http://localhost:8080/hotel/faces/login/login.xhtml">http://localhost:8080/hotel/faces/login/login.xhtml</a>	The application is started		
2	Assert that the page is correct		The user is in the login page		
3	Insert user name	marc			
4	Insert password	1010			
5	Click the login button		The user gains access to the system		
6	Assert that the user is logged on		The user is in the first page of the system		

**Test case:** Perform logout

**Test ID:** TC\_2

**Pre-conditions:**

The test user credentials are stored in the database

The system is available at the address: <http://localhost:8080/hotel/faces/login/login.xhtml>

Step	Test step	Testdata	Expected result	Pass/Fail	Notes/bug
1	Open the browser and start the system	<a href="http://localhost:8080/hotel/faces/login/login.xhtml">http://localhost:8080/hotel/faces/login/login.xhtml</a>	The application is started		
2	Assert that the page is correct		The user is in the login page		
3	Insert user name	marc			
4	Insert password	1010			
5	Click the login button		The user gains access to the system		
6	Assert that the user is logged on		The user is in the first page of the system		
7	Click on the menu element		Menu is opening with the option "logout"		
8	Click on the logout element		The user exits the system		
9	Assert that the page is correct		The user is in the login page		

**Test case:** Create new user

**Test ID:** TC\_3

**Pre-conditions:**

The test user credentials are stored in the database

The system is available at the address: <http://localhost:8080/hotel/faces/login/login.xhtml>

Step	Test step	Testdata	Expected result	Pass/Fail	Notes/bug
1	Open the browser and start the system	<a href="http://localhost:8080/hotel/faces/login/login.xhtml">http://localhost:8080/hotel/faces/login/login.xhtml</a>	The application is started		
2	Assert that the page is correct		The user is in the login page		
3	Insert user name	marc			
4	Insert password	1010			
5	Click the login button		The user gains access to the system		
6	Assert that the user is logged on		The user is in the first page of the system		
7	Click the client button		The user sees a list of current clients		
8	Click Create new client		The user sees a form for a new client		
9	Insert name	Kanin			
10	Insert email	ka@nin.se			
11	Choose gender	Male			
12	Insert social security number	556677			
13	Click save button		Message about successful creation		
14	Click the user button		The user sees a list of current users		
15	Assert that the page is correct		The user is in the user page		
16	Click Create New User		The user sees a form for a new user		
17	Choose Type of user	Common			
18	Insert Login	filippa			
19	Insert password	filippa123			
20	Insert Retype password	filippa123			
21	Choose client	Kanin			
22	Choose user status	Active			
23	Click the save button		Message about successful creation		

**Test case:** Create new client

**Test ID:** TC\_4

**Pre-conditions:**

The test user credentials are stored in the database

The system is available at the address: <http://localhost:8080/hotel/faces/login/login.xhtml>

Step	Test step	Testdata	Expected result	Pass/Fail	Notes/bug
1	Open the browser and start the system	<a href="http://localhost:8080/hotel/faces/login/login.xhtml">http://localhost:8080/hotel/faces/login/login.xhtml</a>	The application is started		
2	Assert that the page is correct		The user is in the login page		
3	Insert user name	marc			
4	Insert password	1010			
5	Click the login button		The user gains access to the system		
6	Assert that the user is logged on		The user is in the first page of the system		
7	Click the client button		The user sees a list of current clients		
8	Click Create new client		The user sees a form for a new client		
9	Insert name	Fluga			
10	Insert email	flu@ga.se			
11	Choose gender	Female			
12	Insert social security number	889911			
13	Click save button		Message about successful creation		

**Test case:** Edit client

**Test ID:** TC\_5

**Pre-conditions:**

The test user credentials are stored in the database

The system is available at the address: <http://localhost:8080/hotel/faces/login/login.xhtml>

Step	Test step	Testdata	Expected result	Pass/Fail	Notes/bug
1	Open the browser and start the system	<a href="http://localhost:8080/hotel/faces/login/login.xhtml">http://localhost:8080/hotel/faces/login/login.xhtml</a>	The application is started		
2	Assert that the page is correct		The user is in the login page		
3	Insert user name	marc			
4	Insert password	1010			
5	Click the login button		The user gains access to the system		
6	Assert that the user is logged on		The user is in the first page of the system		
7	Click the client button		The user sees a list of current clients		
8	Click the edit button	ID 10	The user sees the edit view		
9	Change the social security number	556678			
10	Click save button		Message about successful update		

**Test case:** Delete client

**Test ID:** TC\_6

**Pre-conditions:**

The test user credentials are stored in the database

The system is available at the address: <http://localhost:8080/hotel/faces/login/login.xhtml>

Step	Test step	Testdata	Expected result	Pass/Fail	Notes/bug
1	Open the browser and start the system	<a href="http://localhost:8080/hotel/faces/login/login.xhtml">http://localhost:8080/hotel/faces/login/login.xhtml</a>	The application is started		
2	Assert that the page is correct		The user is in the login page		
3	Insert user name	marc			
4	Insert password	1010			
5	Click the login button		The user gains access to the system		
6	Assert that the user is logged on		The user is in the first page of the system		
7	Click the client button		The user sees a list of current clients		
8	Click the delete button	ID 10	Message about successful delete		

**Test case:** View bedroom

**Test ID:** TC\_7

**Pre-conditions:**

The test user credentials are stored in the database

The system is available at the address: <http://localhost:8080/hotel/faces/login/login.xhtml>

Step	Test step	Testdata	Expected result	Pass/Fail	Notes/bug
1	Open the browser and start the system	<a href="http://localhost:8080/hotel/faces/login/login.xhtml">http://localhost:8080/hotel/faces/login/login.xhtml</a>	The application is started		
2	Assert that the page is correct		The user is in the login page		
3	Insert user name	marc			
4	Insert password	1010			
5	Click the login button		The user gains access to the system		
6	Assert that the user is logged on		The user is in the first page of the system		
7	Click the bedroom button		The user sees a list of current bedrooms		
8	Assert that the page is correct		The user is in the bedroom page		

**Test case:** View reservation

**Test ID:** TC\_8

**Pre-conditions:**

The test user credentials are stored in the database

The system is available at the address: <http://localhost:8080/hotel/faces/login/login.xhtml>

Step	Test step	Testdata	Expected result	Pass/Fail	Notes/bug
1	Open the browser and start the system	<a href="http://localhost:8080/hotel/faces/login/login.xhtml">http://localhost:8080/hotel/faces/login/login.xhtml</a>	The application is started		
2	Assert that the page is correct		The user is in the login page		
3	Insert user name	marc			
4	Insert password	1010			
5	Click the login button		The user gains access to the system		
6	Assert that the user is logged on		The user is in the first page of the system		
7	Click the reservation button		The user sees a list of current reservations		
8	Assert that the page is correct		The user is in the reservation page		

**Test case:** Delete bill

**Test ID:** TC\_9

**Pre-conditions:**

The test user credentials are stored in the database

The system is available at the address: <http://localhost:8080/hotel/faces/login/login.xhtml>

Step	Test step	Testdata	Expected result	Pass/Fail	Notes/bug
1	Open the browser and start the system	<a href="http://localhost:8080/hotel/faces/login/login.xhtml">http://localhost:8080/hotel/faces/login/login.xhtml</a>	The application is started		
2	Assert that the page is correct		The user is in the login page		
3	Insert user name	marc			
4	Insert password	1010			
5	Click the login button		The user gains access to the system		
6	Assert that the user is logged on		The user is in the first page of the system		
7	Click the bill button		The user sees a list of current bills		
8	Click the delete button	ID 50	Message about successful delete		

**Test case:** Back to Dashboard

**Test ID:** TC\_10

**Pre-conditions:**

The test user credentials are stored in the database

The system is available at the address: <http://localhost:8080/hotel/faces/login/login.xhtml>

Step	Test step	Testdata	Expected result	Pass/Fail	Notes/bug
1	Open the browser and start the system	<a href="http://localhost:8080/hotel/faces/login/login.xhtml">http://localhost:8080/hotel/faces/login/login.xhtml</a>	The application is started		
2	Assert that the page is correct		The user is in the login page		
3	Insert user name	marc			
4	Insert password	1010			
5	Click the login button		The user gains access to the system		
6	Assert that the user is logged on		The user is in the first page of the system		
7	Click on Show all bedrooms		The user sees a list of current bedrooms		
8	Assert that the page is correct		The user is in the bedroom page		
9	Click on index button				
10	Assert that the page is correct		The user is in the first page of the system
